SUMMARY

I am an AI Software Engineer and Full Stack Developer with 4.5+ years behind me building business software, AI integrations and process automation, and today I lead IT and software engineering at Diprolam, where the CRM, the inventory system and the purchasing flow run in production while the corporate ERP for more than 100 people and a multi-tenant SaaS platform are still in my hands, after two years at Grupo Megamedia and its newspaper Diario de Yucatán on LLM integrations, chatbots and OCR search over the archive, and a year on my own building sites and small automations for local businesses.

EXPERIENCE

Head of IT & Software Engineering

Feb 2026 — Present

Diprolam | Monterrey · Guanajuato · Puebla · Tijuana

- Lead technology operations across the company's four cities, keeping critical systems, infrastructure and business services available
- Built and shipped the enterprise CRM now in production, where customers, the pipeline and every open opportunity live
- Built the inventory system running in the four cities, where every movement carries a record and a name, which ended the tool loss and the spending nobody could account for
- Built the purchasing system that runs from the request to the reception, where the administrative cycle went from stretching to about six days to closing the same day, and which carries more than eight thousand orders and over a hundred users
- Architect the corporate ERP, in development, for more than 100 people, centralizing inventory, procurement, warehouse, supplier and administrative processes
- Design a multi-tenant SaaS platform, in development, with authentication, file storage, document generation and role-based access control
- Manage cloud infrastructure on Linux, Docker, AWS and DigitalOcean, and define cybersecurity policies, backups and disaster recovery plans

Technologies: Python, React 19, TypeScript, TanStack, Tailwind CSS v4, Supabase, PostgreSQL, Docker, AWS, DigitalOcean, Linux

AI Solutions Engineer & Project Lead

Aug 2025 — Jan 2026

Grupo Megamedia | Mérida

Group-level role, held alongside the Diario de Yucatán position below

- Coordinated and implemented AI and automation projects across several business areas of the group
- Designed and integrated conversational AI systems, backend services and workflow automations
- Built API integrations and backend services with Python, FastAPI and PostgreSQL
- Evaluated emerging AI tools and automation platforms and recommended which ones to adopt

Technologies: Python, FastAPI, OpenAI API, LLMs, n8n, Docker, PostgreSQL, React

AI & API Software Developer

Jan 2025 — Feb 2026

Diario de Yucatán (Grupo Megamedia) | Mérida

Ran in parallel with the group-level role above

- Built an automated accounting receipt system in Python that replaced a manual process
- Integrated the ChatGPT API to generate automated financial summaries for management
- Integrated WooCommerce, Zoho CRM and ElevenLabs to automate sales and marketing workflows
- Designed chatbots for lead generation and customer support, adopted company-wide
- Automated real-time data synchronization across platforms

Technologies: Python, OpenAI API, REST APIs, WooCommerce API, Zoho CRM, Zoho SalesIQ, ElevenLabs, JavaScript

Web Developer

Jan 2024 — Dec 2024

Diario de Yucatán (Grupo Megamedia) | Mérida

- Developed the chatbot on the public job board Empléate.app that automated user registration and job applications
- Implemented AI-based automation that spots promoted vacancies and puts them in front of the right applicants
- Led development of the Hemeroteca portal the newsroom uses in house, with OCR search over a century of digitized print
- Optimized performance and stability of web platforms, reducing errors and load times

Technologies: Nuxt, Vue.js, Vuetify, MongoDB, AWS, OCR, Anthropic Claude, Chatbase, WordPress

Software Engineering Intern

Sep 2023 — Jan 2024

Universidad Anáhuac Mayab | Mérida

- Developed institutional web applications with React, TypeScript and Nuxt
- Contributed to the Consultation Center portal and other academic websites
- Carried out performance improvements and ongoing maintenance of web platforms

Technologies: React, TypeScript, Nuxt, JavaScript

Technical Support / Bot Developer

Feb 2023 — Sep 2023

Universidad Anáhuac Mayab | Mérida

- Resolved user issues through a ticketing system and direct support
- Developed a Discord bot with Python and the OpenAI API for automation and community management

Technologies: Python, OpenAI API, REST APIs, Git

Freelance Web Developer

Mar 2022 — Jan 2023

Self-employed

Survey software for a political campaign

Most of the year · React · TypeScript · Python · MongoDB

- Built the field capture the teams on the street used to record every survey as they walked it
- Built the dashboard that showed the answers as they landed, so the campaign could read the day while it was still happening
- Kept every answer in a structured base, in the spirit of Airtable, so the data could be filtered, crossed and exported
- Produced the breakdowns and statistics the campaign made its decisions on

Sites and online stores for local businesses

- Built each site and store in React instead of a template, with the catalogue, the orders and the pages the owner actually needed

Small automations for clients

- Wrote simple bots in Python for clients who were repeating the same task by hand every single day

EDUCATION

Relevant coursework: Web Application Development · Software Testing & QA · Advanced Database Design & Optimization · Data Analysis & Intelligent Data Processing

SKILLS

Languages — Python · TypeScript · JavaScript · SQL

Frontend — React 19 · Next.js · TanStack Start/Router/Query · Vue.js · Nuxt · Vuetify · React Native · Tailwind CSS v4 · shadcn/ui · Vite

Backend & apis — FastAPI · Flask · Django · Express · REST APIs · GraphQL · Microservices · Zod

AI & automation — OpenAI API · Anthropic Claude · LangChain · LLM integrations · AI agents · Conversational AI · OCR · Chatbase · Botpress · ElevenLabs · n8n

Databases — PostgreSQL · Supabase · MongoDB · MySQL · Redis

Cloud & infra — AWS · DigitalOcean · Vercel · Docker · Kubernetes · Linux · CI/CD · Backups & DRP

Business platforms — ERP / CRM / SaaS development · Zoho CRM · Zoho SalesIQ · Zoho Marketing Automation · Zoho Inventory · Zoho Books · WooCommerce · WordPress

Tools — Git · GitHub · FlutterFlow

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) — Amazon Web Services (2026)
- CCNA — Cisco (2026)
- Associate Cloud Engineer — Google Cloud (2026)
- AI Engineer for Developers Associate (2026)
- SOC — Cisco (2026)

COURSES

- Generative AI with LLMs — DeepLearning.AI
- Machine Learning with Python — Coursera
- Designing ML Workflows in Python
- Software Development with Claude Code
- Advanced AI-Assisted Coding
- Advanced Prompt Engineering
- AWS Cloud Development
- Docker & Kubernetes: The Practical Guide
- Full-Stack Web Development with React
- Data Structures and Algorithms
- Google Business Intelligence
- SAP Professional Fundamentals
